COMPANY PROFILE

JEC AFRICA COATING AND INSULATION COMPANY LIMITED

JEC Africa Coating and Insulation Company Limited specializes in the development, manufacturing, and delivery of corrosion, fire protection, and thermal insulation solutions for demanding environments. We are dedicated to providing high-performance polymer solutions to industries globally. Leveraging our extensive materials expertise and commitment to exceptional customer service, we actively support our clients across a broad and growing spectrum of sectors in achieving their business objectives.

COMPANY PROFILE

Providing Innovative Solutions

- **Coating Solutions:** Our coating expertise extends to a wide array of applications, including protective coatings that shield against environmental factors and corrosion. We at JEC AFRICA COATING AND INSULATION COMPANY LIMITED employ advanced techniques to enhance the durability and lifespan of industrial assets, contributing to cost-effective maintenance strategies.
- **Insulation Services:** Recognizing the critical role insulation plays in energy efficiency and safety, we excel in providing thermal, acoustic, and fire insulation solutions. By leveraging state-of-the-art materials and methodologies, we at JEC AFRICA COATING AND INSULATION COMPANY LIMITED contribute to the creation of insulated environments that optimize performance and adhere to the highest safety standards.

COMPANY PROFILE

SERVICES

COMPANY PROFILE

SERVICES

Anticorrosion Coating Application

At JEC AFRICA COATING AND INSULATION COMPANY LIMITED we specialize in the application of advanced anticorrosion coatings. These coatings act as a protective barrier, preventing corrosion and deterioration of industrial assets exposed to harsh environmental conditions. By applying high-quality anticorrosion coatings, our company enhances the longevity and performance of critical infrastructure.

COMPANY PROFILE

SERVICES

Polymer Coating (3LPE, 3LPP, 5LPP)

Our company offers polymer coatings such as 3LPE (Three-Layer Polyethylene), 3LPP (Three-Layer Polypropylene), and 5LPP (Five-Layer Polypropylene). These coatings provide superior protection against corrosion, abrasion, and other external factors. Each layer serves a specific purpose, collectively ensuring robust performance and durability, making them ideal for pipelines, equipment, and structures in demanding industrial environments.

COMPANY PROFILE

SERVICES

Silicone Insulation

At JEC AFRICA COATING AND INSULATION COMPANY LIMITED we provide silicone insulation services. Silicone insulation is known for its high-temperature resistance and electrical insulation properties. This service is particularly valuable in industrial settings where elevated temperatures or electrical components require protection. The application of silicone insulation enhances safety and efficiency in diverse operational environments

COMPANY PROFILE

SERVICES

Injection Molded Polyurethane (IMPU)

IMPU refers to the application of injection-molded polyurethane, a versatile material known for its durability and flexibility. At JEC AFRICA COATING AND INSULATION COMPANY LIMITED we utilize this technique to create customized components and protective coatings. IMPU is favored for its ability to withstand abrasion, impact, and harsh environmental conditions, making it suitable for a wide range of industrial applications.

COMPANY PROFILE

SERVICES

Fiberglass Reinforced Resin/Epoxy

Our company offers services involving fiberglass reinforced resin/epoxy. Fiberglass reinforcement enhances the mechanical strength and durability of resin or epoxy-based materials. This composite is widely used in the construction and protection of industrial structures, providing a lightweight yet robust solution for applications where both strength and corrosion resistance are essential.

COMPANY PROFILE

SERVICES

At JEC AFRICA COATING AND INSULATION COMPANY LIMITED our expertise extends to a diverse range of specialized services, including advanced anticorrosion coatings, polymer coatings with multiple layers, silicone insulation for high-temperature applications, injection-molded polyurethane for customized solutions, and fiberglass-reinforced resin/epoxy for enhanced structural strength and corrosion resistance. These services collectively contribute to the protection and optimization of industrial assets.

COMPANY PROFILE

Professional Business

Safety and Environmental Responsibility:

Our company not only emphasizes quality but also prioritizes safety and environmental responsibility. At JEC AFRICA COATING AND INSULATION COMPANY LIMITED we integrate sustainable practices, using eco-friendly materials and safety protocols to ensure the well-being of both its workforce and the environment.

COMPANY PROFILE

Professional Business

Quality Assurance:

We JEC AFRICA COATING AND INSULATION COMPANY LIMITED prioritize quality assurance, implementing stringent control measures at every coating and insulation stage. This ensures effective solutions and compliance with regulatory standards and industry best practices.

COMPANY PROFILE

Professional Business

Client-Centric Approach:

Committed to lasting partnerships, We at JEC AFRICA COATING AND INSULATION COMPANY LIMITED adopt a client-centric approach. Tailoring solutions to each client's unique needs fosters collaborative relationships built on trust, reliability, and mutual success.
